New Federal Data Protection Act

As of September 1st, 2023 the new Swiss Federal Data Protection Act will come into force. Under the revised Data Protection Act, all Swiss pension funds must meet increased requirements relating to data protection.

In order to comply with all the new legal requirements Syngenta Pension Fund has documented all relevant internal processes, adjusted contractual documents with business partners, and conducted a data protection impact assessment. The Board of Trustees has also appointed Alessia Soder as an independent data protection officer of the Syngenta Pension Fund. The data protection officer monitors compliance with data protection regulations, advises the pension fund on data protection matters and is the contact person for the insured members and for the Swiss authorities responsible for data protection in Switzerland. If you have any data privacy related questions reach out to: dataprivacy.ch@syngenta.com.

The Syngenta pension fund has published a data privacy notice on its website and on the pension fund web portal, which explains in detail what personal data is processed, why and for what purpose, and how the pension fund guarantees its security.
